

```
1  /*
2  Notes
3
4  We use long instead of int for big Full Numbers.
5
6  Every time writing System.out.print for showing
7  something on screen is lengthy. So we made
8  show() function just like main().
9
10 It avoids repeating same line
11 System.out.print
12 at three places.
13 We use show() which is small
14 compared to.
15

21     public static void show(String str)
22     {
23         System.out.print(str);
24     }
25     public static void main(String[] arguments)
26     {
27         long length, width;
28         long fencing_length;
29         Scanner scan = new Scanner(System.in);
30
31         show("Provide Length Of Dev Site : ");
32         length = scan.nextLong();
33         show("Provide Width Of Dev Site : ");
34         width = scan.nextLong();
35
36         fencing_length = 2 * length + 2 * width;
37
38         show("Fencing Length of Dev Site : " + fencing_length);
39     }
40 }
```
